

# Adding Friends

Press esc and click on the social menu

There are many ways to add new friends,  
At the top right of this menu is a search bar, click on that and search for your friends using their names! Click on the user and then 'send friend request'

You can also send a request to another player by standing in front of them and opening your menu by pressing esc, you can then target them and send a request.

Your friends can search for you in the same way and you'll have a letter icon appearing near your microphone icon to indicate a new friend request or a world invite.

Once you are friends with someone you can go to your social tab, click on them and from there you can either invite them to where you are, request they invite you to their world or just join them without asking!
