

New to VRchat

Are you a new VRchat player? Let me walk you thru some simple things to get you going for the convention!

You don't need a VR headset to play in VR! This tutorial is done in desktop mode

First thing first, you need to make a vrchat account!

Second you will need to download VRchat on steam.

You're doing great!

Wait for the game to install and once that's done launch VRchat!

Use your vrchat login details from earlier

And hopp you go into the tutorial level. Take the time you need going through this :)

You move using the WASD keys. You can run by holding down shift and the camera follows your mouse.

As soon as you exit the tutorial level you gain access to your menu by pressing esc.
